
HOSAM ABDELTAWAB NODE.JS

1. IF YOU HAVE A NODE.JS ENVIROMENT INSTALLED ON COMPUTER GO TO #2.

- ☐ Go to: <https://www.jetbrains.com/idea/download/#section=windows>
- ☐ Download IntelliJ IDEA, it is free for students.
- ☐ Install IntelliJ IDEA.
- ☐ Familiarize yourself with the application.
- ☐ Go to step #2.

2. IMPORTING PROJECTS.

- ☐ Unzip the “Node.zip” file to a desired location. Inside you will find 2 projects: “express” & “NodeJS”.
- ☐ Import both files into your workspace. Keep in mind that these are 2 separate projects.
- ☐ Familiarize yourself with the files inside each project.
- ☐ When comfortable with files and file names, go to step #3.

3. RUNNING.

- ☐ Keep in mind that inside “NodeJS” folder there are multiple folder. Each one should run by itself.
- ☐ You will need to use google chrome whenever you run a server. Port numbers are provided in project.
- ☐ Run programs.
- ☐ When finished, put grade in BlackBoard.
